

Experiment -1

Car Booking Reservation System Using Zoho One (SaaS)

Aim

To create a **Car Booking Reservation System** using **Zoho One** as a cloud-based Software as a Service (SaaS) application.

Procedure

1. Log in to the **Zoho One** cloud platform.
2. Open **Zoho Creator** from the Zoho One applications.
3. Create a new application for the **Car Booking Reservation System**.
4. Create a new form named **Car Booking Reservation**.
5. Add the required fields:
 - From
 - To
 - Rental
 - Outstation
 - Package Type
 - Hours/Days
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Save and publish the form.
9. Enter sample cab booking details into the form.
10. Submit the form and verify that the entered data is stored in the cloud.
11. Test the application by entering different booking details.
12. Verify that the **Car Booking Reservation System** works successfully as a SaaS application.

Implementation

Input:

The screenshot shows the 'Book a Cab' form in the Zoho Creator app. The form is titled 'Book a Cab' and is located in the 'Development' environment. The form fields are as follows:

- Customer Name * (First Name, Last Name)
- Employee ID *
- Email Id *
- Mobile Number * (+91 81234 56789)
- Gender * (Male, Female)
- Booking Date * (01-Oct-2026)
- Travel Date * (dd-MMM-yyyy)
- Pickup Time * (-Select-)

Output:

The screenshot shows the 'Bookings' list and the 'Overview' details in the Zoho Creator app. The 'Bookings' list shows a single booking for 'Rage Yaswanth' on '02-Oct-2026'. The 'Overview' details are as follows:

Overview	
Customer Name	Rage Yaswanth
Employee ID	192572023
Email Id	192572023.simats@saveetha.com
Mobile Number	+919347066247
Gender	Male
Booking Date	01-Oct-2026
Travel Date	02-Oct-2026
Pickup Time	Time 1
Pickup Address	Saveetha Collage, Saveetha Collage, Chennai, Tamil Nadu, 602105, India
Destination Address	Poonamalle, Poonamalle, Chennai, Tamil Nadu, 602105, India

Result

Thus, a **Car Booking Reservation System** was successfully created using **Zoho One** and demonstrated as a **Software as a Service (SaaS)** application.
